

Visa Payments Cybersecurity Certification

Learn how to safeguard payments in today's ever-evolving digital landscape while elevating your career with a certification from Visa.

The need for payments cybersecurity professional is unprecedented and only likely to grow. Developed in partnership with Visa's cybersecurity experts, the Visa Payments Cybersecurity Certification program is designed to help the industry meet that need while helping you learn new skills, advance your career and expand your cybersecurity knowledge.

Our program consists of recommended courses that help you prepare to take the certification exam. Upon passing the exam, you'll be recognized as Visa Certified in Payments Cybersecurity.

How to become Visa Certified

COURSE I

Payments Cybersecurity I

Start with our level I course to build foundational knowledge and prepare for the certification process.

COURSE II

Payments Cybersecurity II

If you have cybersecurity experience and are ready to start the certification journey, our level II course is a great starting point. It is designed to enhance your knowledge of essential cybersecurity and risk management concepts and their practical applications within the payments industry prior to taking the Payments Cybersecurity certification exam.

CERTIFICATION EXAM

Visa Payments Cybersecurity Certification Exam

Upon passing the exam, you'll become Visa Certified and will receive a digital badge to highlight your achievement.
